Daniel & Anibe (Ah-nee-bay) Edeh

The neck brace is very helpful

Good news about Daniel's health. He feels so much better, and the doctor agreed when he saw him in late April that he is improving greatly. We are overjoyed that the need for surgery to relieve the pressure of the brain bleed is **ruled out**. Daniel is to continue using a neck brace for a pre-existing condition and return to see the doctor in 6 weeks. Praise the Lord with us!

A huge THANK YOU!!!! to everyone who prayed, wrote messages of encouragement or donated funds toward Daniel's medical bills, a replacement vehicle, and the daily needs of Ministry of Mercy. Where would we be without you!

Water crisis at both MoM campuses

- The well at the Otutulu campus is producing muddy water. The natural spring needs to be protected from contamination.
This campus houses 300 children and many staff members.
- All four boreholes at the Lokoja campus are producing very little water. Others in the city are experiencing the same problem with their boreholes. Daniel is asking a group related to UNICEF to determine what needs to be done. We are hoping that drilling deeper into the very rocky ground will tap into adequate water supplies.

This campus houses 100 children, the staff, and the MoM Medical Center.

Cleaning mud out of the tanks at Otutulu.

We are expecting that the remedies to these water issues will take a lot of expertise, equipment, and supplies. Please pray for wisdom, good recommendations, and provision.

Blessings!

Esther Nordman for MoM
